- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

LANGUAGES

- Kazakh (Fluent)
- Russia(Fluent)
- English(Basics)

PROFILE

** About yourself**

I am a novice Back–End developer, striving for constant growth and development in the IT field. I have basic knowledge in programming, and I am actively studying server technologies and databases. I like to understand how systems work "from the inside", and with great interest I immerse myself in solving problems related to architecture and optimization.

PROGRAMMING SKILLS

- **Git:** I have experience working with the Git version control system, including basic commands and branching processes.

- **Java Core:** I have good knowledge of the basics of Java, including object-oriented programming, exceptions and collections.

- **Spring Framework (in the learning process):** I am studying Spring Boot for the development of RESTful services and dependency management in applications.

- **PostgreSQL (in the learning process):** I am learning how to work with the PostgreSQL database, including creating tables, writing queries and managing data.

- **JavaScript (in the learning process):** Started learning JavaScript to improve interaction with the frontend part of applications.

I continue to develop these skills through practical projects and specialized courses.
